

Ryan Lim Yi Ming

London, United Kingdom, +447761997180, ryanlim.ryml@gmail.com, [GitHub](#), [LinkedIn](#)

Profile

Recent Computer Science graduate (specialization in AI) with a passion for mathematics, eager to build a career in Artificial Intelligence. With rapid and exciting changes in current methodologies, I look forward to continuous learning of new AI methods and developments. For a more in-depth look into who I am, I heavily recommend visiting my [personal website](#)

Education

Sep 2021- May 2024

Bachelor of Science in Computer Science (AI Specialization), Kings College London

Graduated with Upper Second Class Honours (2:1).

Artificial Intelligence specific modules:

- Pattern Recognition, Neural Networks and Deep Learning Level 7
- Machine Learning Level 6
- Optimization Methods Level 6
- Artificial Intelligence Reasoning and Decision-Making Level 6
- Computational Models Level 6
- Introduction to Artificial Intelligence Level 5

Further modules studied: Software Engineering Group Project, Introduction to Software Engineering, Data Structures, Practical Experiences of Programming, Database Systems, Programming Practices and Applications, Computer Systems, Elementary Logic with Applications, Foundations of Computing 1/2, Introduction to Robotics, Operating Systems and Concurrency, Cryptography, Introduction to Professional Practice

Aug 2016 – Jun 2021

Kolej Yayasan UEM & SRI KDU International School, Malaysia

Advanced Levels – **3 A*s in Mathematics, Further Mathematics, Physics**, and an **A in Chemistry**

IELTS – **Band 8.5, 8.0, 8.0 & 6.0** in Listening, Reading, Speaking & Writing respectively and a **7.5 overall Band Score**

IGCSEs – **5A*s & 4As**, with A*s in Mathematics, Additional Mathematics and the 3 Sciences and an A in Computer Science

Additional Courses:

Introduction to Deep Learning & Neural Networks with Keras (IBM), Typescript: Learn the fundamentals

Technical Skills

Languages/Frameworks (proficient): Python, Git, Docker, Keras, Matplotlib, Numpy, scikit-learn

Languages/Frameworks (prior experience): C++, AWS, Scala, Haskell, React, Node.js, Django, Bootstrap, PostgreSQL, Typescript

Coursework & Projects

Sep 2021- May 2024

Noteworthy Coursework

Name	Details	Tools
<i>Dissertation on Automated Test Generation using LLMs (Large Language Models).</i>	-Scraped GitHub for 2 datasets with 134507 datapoints and 39986 datapoints respectively (depending on the focal context match) for training the LLM (OpenAI GPT 3.5).	OpenAI – API, Python

<i>Web development with a PERN stack, docker and git.</i>	- Co-Developed a ticket purchasing site with an artificial client to simulate industry standards and to apply software engineering methods - Applied agile methods due to changing client demands	, React, Express, Postgres, Prisma, Git
<i>Implemented Q-Learning and Value iteration to Automate Agents</i>	-Implemented these methods to a Pacman Environment to allow it to win	Python
<i>Personal Website</i>	-Developed a react website to showcase my abilities	React, Express, Node, Three.js

Leadership & Additional Activities

Apr 2020 – Jun 2021 Student Council (Male Sports Executive)

- **Oversaw the management** of anything sports related, organisationally, and logistically.
- Acted as a **representative of the student body** on sports matters.

Other Skills & Interests

Languages: English (Fluent)

Interests: Rock Climbing (Joined the KCL climbing team, **participated in multiple competitions**, and am aiming to climb V14), Sailing (crossed the British channel with KCL sailing team), Cooking, Food, Travel, Video Games, Anime
